COX-T-13-01

Re: Idaho Broadband Equipment Investment Tax Credit
Cox Communications, Inc.
Federal EIN: 95-2755479

Dear Ms. Jewell:

Pursuant to Idaho Case No. GNR-T-01-10, Cox Communications, Inc. and its subsidiary Coxcom, Inc. (FEIN: 95-2755479) ("Cox") requests that equipment as discussed in this application be deemed "qualified" broadband equipment for purposes of the Idaho Broadband Equipment Investment Tax Credit. Cox was unaware of this requirement so it is respectfully requesting approval from 2006 through 2010.

1. Name and address of applicant including the contact person in the event there are questions regarding the application and its content.

   Idaho Location:
   Cox Communications, Inc. (d/b/a Coxcom, Inc.)
   105 Lewis Street
   Ketchum, ID 83340

   Mailing Address:
   Cox Communications, Inc.
   Attn: Jeffrey Langer
   1400 Lake Hearn Drive, NE
   Atlanta, GA 30319

   If email or phone communication is desired: Jeffrey.Langer@coxinc.com and 678-645-0352.

2. Identify the area or location where the equipment is installed in Idaho.

   Cox's equipment is installed in the cities of Ketchum, Hailey, and Bellevue and surrounding areas. See attached map at Exhibit A.

3. Describe the type of broadband service(s) offered to the public in Idaho.

   Cox provides broadband service to residential and commercial customers. Cox offers various levels of service:

   - **Economy/Starter**
   - **Value/Essential**
   - **Preferred**
   - **Premier**
   - **Ultimate (this service began in 2010)**

4. State the transmission rate in bits per second at which subscribers to the relevant broadband network can receive and send (download and upload).

   Depending on the year, the rate in bits per second for download and upload varied.

   - **Economy/Starter: Prior to 2010: 768 kbps download x 256 kbps upload;**
     2010: 1 mbps download x 384 kbps upload
   - **Value/Essential: Prior to 2010: 1.5 mbps download x 256 kbps upload;**
     2010: 3 mbps download x 768 kbps upload
   - **Preferred: Prior to 2009: 7 mbps download x 512 kbps upload;**
     2009: 9 mbps download x 768 kbps upload
     2010: 12 mbps download x 1 mbps upload
   - **Premier: Prior to 2009: 12 mbps download x 1 mbps upload;**
     2009: 15 mbps download x 1.5 mbps upload
     2010: 20 mbps download x 2 mbps upload
   - **Ultimate: 2010: 50 mbps download x 5 mbps upload**

5. List the brand, manufacturer, model numbers, or other distinguishing features of the installed broadband equipment.

   Cox uses the following brands/manufacturers for installed broadband equipment: Arris (owner of Bigband), Cisco (satellite receives, 10K & Transport equipment), Fuji (Transport equipment), Motorola (Satellite receivers, Broadband transmitters), Concurrent (Video On Demand equipment), Comm/Scope, Inc. (Coax & Fiber Optic cable), C-Cor (Broadband Amplifiers & Line Passives), Regal (Attenuated Taps), Gilbert

(Connectors/Splices), and Alpha Industries (Power Supplies). Unfortunately, due to the volume of equipment, we are unable to provide model numbers.

6. Provide the date(s) or time period(s) when the broadband equipment was installed in Idaho.

   See Exhibit B

7. Provide a written description (including basic schematics or general drawings) of the relevant broadband network including a description of how the installed equipment is "an integral part" of a broadband network.

   See Question 2 (and Exhibit A). If additional information is needed, please let me know.

8. Quantify the percentage and number of potential Idaho subscribers that could be served with the broadband equipment and the percentage and number of non-Idaho subscribers that will be/could be served by the broadband network.

   Cox can provide services to about 15,000 homes in the Sun Valley, Idaho area. Of those homes, the amount with Cox Data plans have grown from 32% to 47% from 2006 to 2010. None of the equipment used by the Cox Sun Valley system provides services to non-Idaho subscribers.

9. Enclose a statement certifying that the applicant has read the applicable statutes for broadband investment income tax credit and the applicant believes that the subject broadband equipment qualifies for the tax credit under *Idaho Code* § 63-3029I.

   To the best of my knowledge, the equipment used by Coxcom, Inc. (FEIN: 95-2755479) in its Sun Valley cable/internet system meets the requirements of Idaho Code § 63-3029I and is therefore eligible for the Idaho Broadband Equipment Investment Credit.

Thank you in advance for your attention to this matter.

Sincerely,

Jeffrey A Langer
Tax Manager
