IPUC

We are so tired of Idaho Power raising Rates. Of course its always a raise. Never a Huge decrease in rates. Our power bills are so high they are about to put us in the street, Homeless, we can not AFFORD These high power bills. Its like paying for a 2nd Mortgage on our house the power rates are so high. Idaho wages are so low. Oregon + California are raising the minimum wage but NOT Idaho. Every thing Keeps going up up up. Except wages they don't go up. Idaho power needs some compotition, If another Power Co. came into this area everybody would Switch companies to Receive a lower rate. I am tired of the excuses the power co comes up with for rate increase like its been a drought year. NO it hasn't. Idaho Power employees drive brand new top of line trucks. Why NOT drive old pickups like the rest of us. Maintence is cheaper then New.

I dont like paying for retirement benefits for employees of Idaho Power. Nobody pays mine. And how does Idaho Power offer scholarships + community project $. Put All that money into lower customer rates. They way over spend and waste money way beyond their means. Let a third outside party balance the books. Things would change The electronic meters was suppose to lower rates but it did not. My rates are the highest they've ever been. Its all a big scam to the customers why does IPUC allow it? It seems IPUC does not care one bit about the people of Idaho struggling. Has IPUC ever said NO to any rate increase? It seems IPUC alway says yes. Maybe IPUC gets a bonus for saying yes. It seems corrupt on so many levels. Changing light bulbs does not help. Its the Extremely high rates thats the BIG Problem. I'd like to see Idaho Power cut their benefits, wages bonus, vacations, picnics, dinner, lunches, trips in half. That would help for starters.

Signed fed up with Idaho Power!
