BEFORE THE IDAHO PUBLIC UTILITIES COMMISSION

IN THE MATTER OF THE APPLICATION) CASE NO. AVU-E-06-03
OF AVISTA CORPORATION FOR)
AUTHORIZATION TO DEFER THE COST) APPLICATION OF
OF A LOAN RELATED TO GRID WEST) AVISTA CORPORATION

Avista Corporation (Avista or the Company) hereby requests that the Idaho Public Utilities Commission (Commission) authorize deferred accounting treatment for loan amounts, as described herein, made to Grid West, a proposed regional transmission organization (RTO), for purposes of funding development efforts. On April 11, 2006 the Grid West Board of Directors voted to request a Plan for Dissolution of Grid West. Avista is requesting deferred accounting treatment for its loan amounts to Grid West, for the opportunity for later recovery in rates.

I. Procedural Information

The name of the Applicant is the Avista Corporation, a Washington corporation, whose principal business office is 1411 East Mission Avenue, Spokane, Washington. The Applicant is an investor-owned utility engaged in the generation, transmission, and distribution of electricity in certain portions of eastern Washington and in northern Idaho. The Applicant also provides natural gas distribution service in certain portions of eastern Washington, northern Idaho, and Oregon.

The Applicant is subject to the jurisdiction of the Idaho Public Utilities Commission, the Washington Utilities and Transportation Commission, the Montana Public Service Commission, the Oregon Public Utility Commission, and the Federal Energy Regulatory Commission.

Communications in reference to this Application should be addressed to:

II. Introduction

Avista has been actively involved in the development of a Pacific Northwest RTO. This activity has been aimed at meeting the policies of the Federal Energy Regulatory Commission (FERC) promoting competitive electric markets. More specifically, FERC Order 888 encouraged the development of independent system operators, and FERC Order 2000 required transmission owners to develop and submit a proposal to establish an RTO, or to explain why such an organization could not be developed. Therefore, this effort and associated costs were essential in the ongoing ownership, development and operation of Avista's transmission system.

Avista signed an initial funding agreement in 2000, as did all other Pacific Northwest investor-owned electric utilities, to provide funding for the start-up phase of Grid West (then named "RTO West"). These start up costs included retaining experts and facilitators, as well as other expenses associated with transmission studies and stakeholder participation. The current balance of Avista's loan to Grid West is \$1,217,499.26, including interest of \$188,187.34. Grid West planned to repay the loans through surcharges to customers once it

became operational. With the recent request for development of a Plan of Dissolution for Grid West, this repayment will not occur. As a result, Avista proposes to defer these costs, with the opportunity for later recovery in retail rates. Avista's loan to Grid West has been recorded in Account 128 - Other Special Funds, and none of the loan amount is presently included in Avista's rates. Other costs incurred by Avista to support Grid West, such as employee salaries, employee travel, and legal expenses, were expensed as incurred and are not included in this request.

The Company continues to work with other regional parties in the pursuit of improvements to ways in which the region's transmission providers operate and manage the region's transmission system. On April 10, 2006, Avista joined ColumbiaGrid as one of its six founding members.¹ ColumbiaGrid intends to draw upon elements developed in both the Grid West and Transmission Improvements Group processes to provide transmission-related coordination and administrative services as soon as possible. Because the ColumbiaGrid effort will be using many of the concepts and technical work that began under Grid West, the Company and the region will benefit from the prior work of Grid West.

III. Deferred Accounting Request

Pursuant to Idaho Code §61-524, Avista proposes to defer the Grid West loan amount for later recovery in rates. Avista estimates that the total amount of the deferred account would be approximately \$421,620, Idaho's portion of Avista's \$1,217,499 loan amount, based on the

¹ Incorporated as a non-profit organization, the founding members, in addition to Avista, include Puget Sound Energy, Seattle City Light, Grant County Public Utility District, Chelan County Public Utility District, and the Bonneville Power Administration.

current electric allocation of 34.63%.² Avista proposes to account for these costs in the following manner: Amounts currently recorded as a loan to Grid West will be transferred from Account 128, Other Special Funds, to Account 182.3, Other Regulatory Assets. Avista will cease accrual of interest on the balance as of March 31, 2006. Attachment 1 shows actual loan amounts to Grid West and the calculation of interest on the loan balance.

Avista does not request a determination of ratemaking treatment of the Grid West loan costs at this time, and instead proposes to address recovery of these costs in a future proceeding.

WHEREFORE, Avista respectfully requests that, in accordance with Idaho Code §61-502, the Commission issue an order authorizing the proposed deferred accounting treatment of the Avista Grid West loan amounts as described in this Application. Avista further requests that this matter be processed under Modified Procedure, in accordance with Rule 201 et. seq.

Respectfully submitted this 26th day of April 2006.

² If there are any partial refunds of unused funds, the deferral account will be adjusted accordingly. The interest portion of this amount is an estimate that is expected to be finalized by June 1, 2006.
