Contact E-Mail: sfrupp\_moscow@msn.com  
Name of Utility Company: Avista  
Add to Mailing List: yes

Please describe your question or comment briefly:

This seems to be a good initiative. The wide availability of Internet access makes this an attractive initiative. I've worked with load management systems in the past and the radio and power line comms systems are expensive to install and maintain. I'd like to hear more about the details of how this would work. It seems that it really depends on how easy the system is to install and use by the end user.
