concern at the public utilities commission.
my name Robert, I am retired on a low income.
Avista just gott a raise in there rates
and I can't afford any more.

so many unemployed and don't know where
It's going to get ~~be~~ better, right and
I can't afford it.
avista should bite the bullet like the
rest of use.

I think lot of people are hunting, I suppose
I could go live in another state. But why
are our elected officials doing what they want.
just for big business and do anything to help
their friends.

In short I am already doing without things I
need for my health.

you should investigate the amount of money
they give some of their management?
avista has big signs in Leviston advertising
at the ball parks? Some special employes
are probably making between 200,000 to 300,000
a year. That's alright yet they want us
to pay for infrastructure of their business.
no wonder some big business have moved
to states that don't have right to work

there ~~was~~ a sign before entering Spokane Washington
saying "Right to work is good why are you coming
Washington work?"

public utilities commission non political committee? B.S.

Dear Commissioner:

When my electric company (Pacific Power & Light sole to Avista I went on COMFORT LEVEL payment plan. It was explained to me that this would be the same amount all year to cover the higher bills in the winter.

I started at \$85 a month; then it went up to \$95 a month and in June I got a letter that it would be \$115 a month, but it went up another \$18 dollar from September to October. I realize you granted them a raise a couple times during this time

The first part of this letter is from the one I sent you 10-30-08. I just got my June statement for \$115 and a letter telling me July would be \$148 per month. My income is just over \$900 a month. My health has changed and I am on more medications, and have to go to the doctor's office monthly now for a Protime test. I know a couple that j\have 2 businesses and got help with their bill from the community. I will not do that because as I told you I will pay my own bills if fair priced.

When I added up all that I have to pay out in June I was left with a total of \$14.00 for the rest of the month. Does this added amount in electric mean I shut off the power? I can't help it if we've had so much cold weather. I turn off my TV most of the day, as well as my computer. I've offered to give up my internet, but that's how I communicate with friends and relatives living a long way off.

Do you have a solution to those of us on very fixed incomes?

Yours truly,

Kit Rinehart
