To Whom It May Concern:
Our Ancestors, Lynner
Bulls, have Sky Racketed.
To this date we are not
caught up from winter
of 09.

We are retired on a
very limited income
with no cost of living
increase in Social Security.
This has been a rough
winter with an early and
long cold snap -

2.

It's very hard to consume
when you are over 70
and have health problems.

It looks like we will
go hungry in this great
state in U.S.A.

Send money overseas to
help others and ignore
U.S. citizens right here
at home.

This proposed new
rate increase on top of
what we have already
been hit with will
be the straw that ^{is} broke the
Camels back here!

We cannot afford TV as
it is now. No luxuries
hardly to get by.

Medical bills keep
going up -
Power going up at
alarming rates. NO
end in sight.

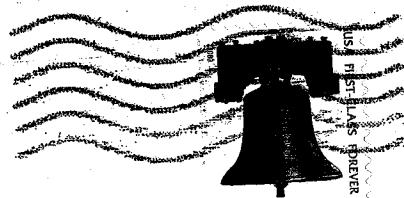

It is time to put a
cap on it.
