Please describe your comment briefly:

We own a ranch near Coeur d'Alene and have purchased the materials to build a 55KW max PV generation facility. This will offset % of our total electrical usage. A system of this peak size is needed because of the low number of solar days available at these northern latitudes.

There is no practical reason to limit the generation size to 25Kw.

We strongly encourage you to lift the 25Kw limit.

Regards
Brent Regan
