To Whom it May Concern,

Time after time, Avista and Century Link keep raising their rates along with Directv, Dish tv, & with the high cost of living, makes it so impossible to afford. Especially during the winter season, it is absurd to pay $200.00 to $400.00 a month, when we all have limited income. (like me) That's why I have to get heating assistance, along with other low-income, who are struggling. That you for hearing me out, I appreciate that so much.

Scott Parrish
