Subject: Re:This is a request to the IPUC to reject the takeover of Avista by Hydro One and its financial controllers.

To: diane.holt@puc.idaho.gov

I live in Hayden Idaho and have only Avista to supply all energy utilities (Gas and Electric) to my residence. We were told by lawyers at a meeting with Avista in Spokane that the CEO and all board members would receive 15 million dollars or more each for selling control of a Vista to Hydro One. Hydro one's supposed resources primarily are copper wire and Ontario Canada entrapped customers all outside the IPUC's jurisdiction. How can Hydro One of Canada meet the demands response policies of a growing Idaho when Capital will be siphoned off completely outside of the IPUCs control destroying the title 61 requirement to provide a "Efficient" utility service to Idaho customers? Efficiency defined by a cost-benefit ratio.in

Thank you for your kind consideration to this pressing matter.

Please stop this sale of our infrastructure to a foreign country...who could sell it to another. There are too many things that could go sideways with Americans paying a huge price. We, the consumer stand to be on the losing end of this bad deal. Please protect us from foreign control our infrastructure. Thank you for your time. Sent from my Verizon Wireless 4G LTE DROID

Subject: NO TO HYDRO ONE PURCHASE OF AVISTA

I have lived and worked here in the northern 2 counties of Idaho all of my 74 years. And, I am incensed by and strenuously object to the proposed sale of Avista (formerly Washington Water Power) to a Canadian company, Hydro One.

I watched what happened in our neighbor State of Montana after Montana Power, which provided very reasonable rates for electricity to Montana residents, was sold to "private corporations", which then proceeded to essential dismantle that once "public utility" and ending up costing Montana residents much more for power.

If private US corporations can cause the harm that was done to the citizens of Montana once Montana Power was privatized, I shudder to think what could happen to we Avista customers should this sale take place, particularly if Hydro One were able to resell to what was Avista to another country (countries).

Sincerely,

Don Swanstrom
