2. The Intervenor are canal companies who have developed and operate small hydroelectric projects within their irrigation projects and who have a substantial interest in these proceedings as a result of those projects. Intervenor have a substantial interest in these proceedings as the projects currently operating generate power purchased by Idaho Power Company pursuant to power sales agreements applying the current eligibility rate caps. Intervenor's projects will require the renewal of those power sales agreements at the expiration of the terms of the current agreements. Further, Intervenor North Side Canal Company is investigating additional sites to construct new small hydroelectric facilities, and the relief requested by Idaho Power Company, Avista Corporation, and Rocky Mountain Power may dramatically impact the ability to develop these new projects.

3. Granting Intervenor's petition to intervene will not unduly broaden the issues before the Commission nor will it prejudice any party to this case.

For the foregoing reasons, Intervenors hereby request that this Commission grant their Petition to Intervene in these proceedings and to appear and participate in all matters as may be necessary and appropriate to protect their interests.

Dated this 14th day of December, 2010.
