Comment_description: RE: IP's request to spend \$410,000 of our money to remotely control private citizen's air conditioning.

What a horrific idea. I can't imagine who would think such a thing was 1) a good idea and 2) it is something that we as customers should pay for.

If this was ever implemented as company policy, I would convert my entire house to a generator and remove myself as a customer of Idaho Power.

Thank you for your time

Comment_description: I do not agree with Idaho Power Regulating our AC. The government already controls enough of our lives. We do not live in Russia. \$5.00 monthly is not enough to warrant the discomfort and foul moods of those living in the household.

I can certainly bet that Idaho Power (all offices) has AC in their buildings. See how your employees fair in the hottest part of the day while working in an office with no AC.
