Comment_description: Everyone please e-mail to Idaho Power. We had the automatic remote meters installed a couple of years ago and it fowled up our clock radio, computer, and everything electric. It changed the time on all our clocks every night when they accessed the meters, so we had to reset the clocks each day. It was really interesting when we needed the alarm clock to get up for an appointment.

We complained frequently and they sent a computer engineer out with a card table, laptop, and lunch to watch our meter for two 8 hour days. Shortly after they removed our meter and installed the old one back. They never offered to replace our clock radio that was ruined by the Automatic Meter Reader.
