Comment_description: Regarding Idaho Power's recent announcement that they want to lower power rates to their customers: We would certainly be in favor of that. There are many people on fixed incomes who struggle to make ends meet and there are lots of young couples who struggle as well. When rates went up last year Idaho Power told us that they would go back down by May of 2003 but that the increase was needed at that time to pay for costs incurred due to the power shortage problem that had occurred.... So, it's May 2003 and we would welcome the lower rate as we approach the summer cooling bills.
