Comment\_description: Excuse me, but are these not the people that for the last 6-8 months have told us how natural gas may go up, but Idaho Power is holding the rates at 1993 levels. As a retired senior and former business person, this company has shown far poor management foresight. Build the plant, then ask the rate payers to pay for it Donot advance them the money. Let Idacorp, the holding company give them the money to build the plant.till it is built , we donot know the real costs.
