Complaint_description: I just received a "Notice of application to increase rates" from Idaho Power. I understand that electricity rates are driven by a number of factors and that they must be adjusted from time to time. However, I find it reprehensible and totally unacceptable that residential customers are, through the higher rates they pay, subsidizing large businesses. There can be no excuse for allowing these large profit making businesses to pay rates substantially below that paid by the general public. If "large commercial, industrial, and irrigation" rates were fair and equal the public would not be bearing an unreasonable burden for the cost of power. I therefore must respectfully request that you correct this travesty by directing Idaho Power to charge all customers one rate.

Comment_description: I want to go on record of strongly opposing the 18% base rate hike being submitted to the commission. This rate hike is unjustified and unnessecary. Idaho Power should have been tracking their base rates over the past ten years and if needed, a small increase spaced over these past few years would probably be more acceptable. I urge the commission to review this case very carefully and if any base rate hike is granted, only a 5% rate would be acceptable. I also am objecting to Id Power's advertising, they are a monopoly, it should be illegal for them to advertise!!!!

Thank you

Wayne Larsen
