Comment_description: We are in a recession, right now. My husband and I are trying to raise 4 children and I am a fulltime student. We can not manage an extra 10-20% increase at this time. We feel that this would put an unfair burden on us and our children. Please think about the consequences of your actions.

Tamera Phillis

Comment_description: IPUC,

I was recently told that Idaho Power has submitted a proposal to increase electricity rates by 19.9%. In addition Idaho Power wants to increase its monthly service charge from \$2.51 to \$10.00. This winter my wife and I are expecting our first child. This new addition to our family will add to our monthly expenses. We have had to come up with creative ways to manage our expenses without increasing our debt or making more money. We tightened our monthly budget by cutting out unnecessary expenses. With the increase that Idaho Power wants my wife and I would have to try to find something else to cut. There is very little money left in our budget to spare. Idaho Power needs to be realistic; a 20% increase is out of this world. My wife and I have seen our other expenses such as gas, fuel, insurance, and food increase monthly but we have not had an increase in pay in over three years. I understand that Idaho Power has addition expenses and would be willing to pay for a small increase such as one to three percent. We feel that poor planing on I Idaho Power's part should not constitute an emergency on ours. Please reject Idaho Power's rate increase proposal.

Thank You,
Marc & Sara Eberhardt

Comment_description: I am 63 yrs old and live on a fixed income of \$549.00 a month. It is very hard for me to pay all my utilities and rent on this amount of money. Let alone trying to buy groceries.

As it stands now I am having a very hard time keeping my utilities on. As the saying goes "I have to rob Peter to pay Paul". One month I have to pay some on the power bill and pay up the phone bill. Have to keep the rent paid or then I will be evicted for non-payment of rent. The next month I have to pay the other bills that was short and short the ones that I had paid up the month before"Lincoln Call: A Presidency Of, By, and For the People." We need to take America back from the wealthy special interests who now control it. Many times we do with out the necssities that we need to live our daily lives. Many times we make the decision if we are paying the bills, getting groceries or letting the power go in order to eat. Granted 4.16% doesn't sound like much but on fixed income it is like a \$100.00 bill Try walking in the shoes of the poor, disabled, the elderly that are vunerable to the public and others.

I would not be able to ever have the power on as it is a struggle for me to keep the power on now as it is. I would loose my power, phone and my home such as it is if this is put into effect. The refund later on down the road don't help me pay for the bills as it is. I am 63 yrs old and live on a fixed income of \$549.00 a month. Comment_description: Dear PUC,

I have recently heard that Idaho Power plans to raise their rates 19% on November 14th. This would absolutely devastate me. I am a single mother of 3 and have to budget for EVERYTHING. I have a hard enough time now trying to keep up with my utilities without such an increase. Please do not allow this to happen. Thank you Paula Reyes

Comment_description: Idaho power is proposing a rate increase that disproportionately penalizes small business. The rate increase for small business is 21%, while that for large business is only 15%. I own a small business and I support 8 families. It is difficult to make my business profitable. This seems like just one more way to add to the burdens carried by most small businesses. I would like to see the increase split more evenly. IN addition, Idaho power is proposing to increase the monthly service charge from 2.50/month to 10.00/month. This is over a 400% increase! Again, I don't think that small businesses should have to foot this much of the burden. Changes of just a couple hundred dollars are felt very deeply by small businesses. A jump from \$30 per year to \$120 per year mean the difference from buying a new piece of equipment or waiting another year.

Thanks for your attention.
Dianne

Comment_description: I wanted to voice my opposition to Idaho Power's proposed increases. I am a homeowner and small business owner in Hailey, and recently heard about the proposed increases. The low profile of this case is very troubling, given the sharp increase all consumers will experience if it is permitted. I do not see why Idaho Power should make such a request except for the impending Mountain Home plant issue. Please support your citizens by denying this application and, if necessary, urge further public debate to determine what is in the best interest for all parties involved.

Thank you for your time.

Complaint_description: The price hike that Idaho Power is requesting is outrageous. We are looking at a 18-20% hike in rates. That is in addition to a base charge hike of almost 400%. These are unreasonable demands. We have no choice but to pay because there is no other power company. I would like this monopoly to stop and if the rates will go up, give us more options in power companies. If a store charges too much, I shop at another store. Lets make Power competitive to protect the consumer.

Comment_description: I realize that operating costs may increase overr time, but 20% far exceeds economic growth in Boise. The proposed 400% increase in service (2.50 to 10.00) fees is out of line as well. Idaho Power cannot operate on a fixed income, but increased should be representative of our economic growth.

Comment_description: I just became aware of the proposed rate increase by Idaho Power for electricity. From what I understand the rate is increasing by 20% and the flat rate will jump by \$7.50 a month. I feel this is way too large of an increase at once. Electric is our primary source of heat and we are on a fixed budget. This will be a very difficult increase all at once and needs to happen more gradually. There has also been very little publicity on this case and I still fail to understand why Idaho Power feels to make such a drastic increase in rate at this crucial time of year of increased energy need. In the least, this increase needs to be phased in over time. Please take this into consideration in your decision.

Thank you

Christine Bolton

Comment_description: Regarding the proposed Idaho Power rate increase:

Increasing the rates and especially the service charge significantly will have a major affect on many residents and businesses throughout southern idaho. I don't think this is the way to go in order to best serve the residents of Idaho. If service charges are increased from \$2.51 to \$10, will the quality of our service also increase in the same proportion? Does this increase have significant benefits for our environment and for more efficient energy use? If the answer to those questions are "not necessarily" or "perhaps," then the rate hike should be denied. If the answer is a resounding "yes" then we must consider the long term benefits.

Comment_description: With regard to Idaho Powers' request to raise rates, I would like to see this request denied or at least see the percentage of the raise reduced to no more than 5%.

It would be disastrous for a private sector company to suddenly raise its rates or prices by 17% without actually adding any value to the service or product. Customers would simply buy elsewhere. Unfortunately, in this situation it is not possible to shop elsewhere and we must rely on justice to protect the consumer from unreasonable price increases.

Ask Idaho Power to do some internal looking for extra dollars, the rest of us have to.

Regards,

Ben Scott

mailing_list_yes_no: no

Comment_description: I recently found out that Idaho Power is planning to increase its rates this month. Raising the monthly charge of 2.50 to 10.00 is too much for residents and small businesses. These added costs need to be passed on to the large businesses that are using the most energy.

Please consider another option.

Sincerely,
Vanessa Crossgrove

Complaint_description: I would like to register my concerns about the proposed rate hike. It is tough enough that Idaho Power wants to raise their rates by 20%, but it is even harder to swallow that they want to raise their service charge by 500%.

We presently have multiple accounts, and as you can imagine we cannot make fulltime use of all of these facilities at the same time, but their proposal to increase the service charge will have a major impact over the course of the year.

In closing I would also like to say. What happened to the proposed rate reduction that was promised last spring? I may be off base, but I have not seen that in any of our bills. For them to promise a reduction, not deliver, and then turn around and say they need a hike leaves me baffled.

Please register this as a complaint in regards to the proposed rate hike.

Thank you

Comment_description: I am against the proposed increase by Idaho Power. This increase is in too large of an increment to occur at once. Perhaps the increase could be added over a number of years? A budget, whether by a business or a consumer, is always planned in advance. Pay raises are given in small increments and so should the proposed rate increase. It would be easier for those on fixed incomes, as well. After all, even our city budget is figured annually.

Comment_description: I would like to register my concerns about the proposed rate hike. It is tough enough that Idaho Power wants to raise their rates by 20%, but it is even harder to swallow that they want to raise their service charge by 500%. Also, when the schedules are reviewed it appears the hardest hit is the small business! What sense does this make? Being a small business owner we have to struggle to make ends meet, and when every penny can make the difference between profit and loss rate increase such as this do not help the Idaho economy.

We presently have multiple accounts, and as you can imagine we cannot make fulltime use of all of these facilities at the same time, but their proposal to increase the service charge will have a major impact over the course of the year.

In closing I would also like to say. What happened to the proposed rate reduction that was promised last spring? I may be off base, but I have not seen that in any of our bills. For them to promise a reduction, not deliver, and then turn around and say they need a hike leaves me baffled.

Comment_description: I received an e-mail stating that Idaho Power wants to increase electricity rates 19.9% and increase the service charge also. PLEASE do the small guy a favor and deny this increase. As a person who lives in an apartment that isn't very winter proof I pay enough with my heat being electric.

Comment description: I have children and am single divorced male. I have a hard time paying food/clothing for my children let alone utilities. I will be moving to 56 Parkview way, Nampa, Idaho 83686 in two days. I bought a house so I could finally earn some equity. How can I make it in this economy if everyone keeps uping the annie. I understand that as the costs of living goes up (it does for everyone in concern-hence you), however, a residual hike would be more reasonable.

Comment_description: I have no complaint with Idaho Power Company recouping the increased cost of doing business through a general rate increase. I do however, object to the 300% increase in the Customer Service Charge.

As outlined in news releases, television commercials and the recent mailing by Idaho Power Company, the purpose of this increase is to cover costs of distribution of power to new development over the past ten years, and to provide meters, reading of same and billing to those new customers.

It seems unfair and illogical to saddle current ratepayers with the costs that should be borne by new development. New service connection fees should be instituted to shift the burden of new development to those who benefit.

I would not mind helping IPC recoup their past expenditures if I knew that future development would not place further burdens on ratepayers. The current arrangement amounts to no more than a subsidy of residential and industrial developers.
