Comment\_description: Idaho Power just released their earnings for the last quarter. Even though they were only granted part of the requested increase, they made alot of money. People cannot afford another increase when the economy is still bad. Our power rates are one of the reasons that companies consider moving to Idaho. We could be pricing our selves right out of business. Some companies may have to layoff or close to pay the power bills if they keep up the rate hikes in times of poor economy. Idaho Power employees enjoy nice big fat raises and bonuses in times when other companies are laying off employees just to stay in business. Most companies are cutting health benefits and are giving no raises because of the economy. Please tell Idaho Power NO!

Thank you,
