I believe that all powerlines should be buried. My sister-in-law died of cancer as did two of her close friends - they lived near (with-in 40 feet) of high power powerlines. My brother-in-law now is having trouble sell his house even though it has been completely cleaned, repainted, carpeted, etc.

The idea of running powerlines thru beams seems to be a fine idea and environmentally the whole state would look better without powerlines running all over the land.

Comment_description: I have recently been made aware of the case involving power lines that are planned between Eagle and Star. I understand the reason these lines are planned is to provide energy to Star and this is a temporary fix until the new substation is built closer to Star. As an Eagle resident, paying Eagle taxes, I have a huge problem with this proposed plan. I understand the City of Eagle has requested information on what it would take to bury these unsightly powerlines and this solution has not only been not evaluated, but has been unilaterally shot down without facts to back up that decision. Eagle is my home and I have chosen to purchase property here, not only because I like it here, but because of property values and their appreciation. Decisions like the one proposed undermines the mission of the City of Eagle and it is important the PUC and Idaho Power listen to the citizens of Eagle before making a grave error in judgment. I say "no" to the power lines, there have to be other technology or logistics solutions to this issue and I demand that those be identified, evaluated, and offered to Eagle residents as a voted issue!!

Comment_description: I hope that Idaho Power will not be allowed to put up those huge metal power poles and instead bury the lines. We have such a great community in Eagle. I would hate for those "eye sores" to decrease property value and lower the asthetic quality of our city.....for a temporary fix. Thank you.
