Comment_description: I stand appauled, reading in todays business section of the newspaper that Idaho Power, ONCE AGAIN, is asking for approval too increase their rates. This appears to be a quarterly request by them anymore. They just change their reason for the request. My question is...WHEN IS ENOUGH, ENOUGH??? Corporate greed is destroying our world a buck at a time. In an economy where corporate profits continue to soar (like Idaho Power's) and paychecks continue to decline, many people on fixed incomes CAN NOT survive, let alone pay their utility bills that continue to RISE. The Idaho Public Utilities Commission should stand firm with all utility companies on behalf of it's citizens and not allow any further rate increases as long as these companies are profitable. Show me their annual books and how many millions they pay out in bonuses to their executives every year as they continue to ask for these increases. Once again, I say, when is enough profit enough???

When the majority of people are living in the streets because they can't afford to heat or illuminate their homes any more? It's time to make a stand and tell them...NO MORE INCREASES...PERIOD!

Comment description: I greatly OPPOSE any more increases to Idaho Power. I just paid my latest bill, and again the usual antics. We already pay an increased power rate, BUT, if you go just above a rate set by Idaho Power(USAGE) they charge an additional fee. Then if your power usage goes above another Idaho Power figure, you pay an additional fee. Thats 2 additional fees they already impose, PLUS the already high charge for power. And in the Customer Service Section, their statement says for METER MAINTENANCE, AND to assist in payment of bills and processing fees. Thats like giving them money to send you a bill. I have been in this same home for over 28 years, and except to reading the meter, have yet to see anywork done on the meter, MAYBE, once, they did install a new improved meter, but I did not request it. PLEASE DO NOT GIVE THIS MONOPLY OF IDAH POWER ANY MORE OF OUR MONEY. It is hard enough for us older senior citizens to pay their bills and feed our families on a limited income.

Comment_description: I would like to express my opinion against the proposed increase in the monthly energy efficiency fee charged to Idaho Power customers. The current 30 cent fee is proposed to increase to 85 cents then to \$1.36 in June 2007. The programs will not really reduce energy consumption because they are not laws regulating anyone only programs to suggest ways to reduce energy use. The proposal will generate a significant dollar return to Idaho Power. Sure thirty cents here and a dollar there don't seem like much, but coupled with all the other 30 cent and dollar charges to all service bills it gets to be expensive and the return for the money spent is just not there.

I am against this increase.
