Re: Id Power and Public Utilities Commission Request (Case ITC-E-05-10)

Sirs:

This is "crazy"!!

Why should WE pay their income tax ?? Id Power is an "owned" entity - let the owners pay - they received their full dividends - could have been reduced. I already pay my fair share of taxes!!

The natural gas plant near Mt. Home is an investment for their owners - why should WE the "captured" user, have to pay up front to benefit their future earnings - when my company expands we borrow or take from net earnings - what did their stockholders give up for this investment?

Did we invest in a coal fired power plant some years ago in Nevada? If so, have we received a return on our "higher rate" - I'm sure the stockholders have (and are).

Please reconsider your increases - maybe we should be getting a credit.

Thank you -

Chris Israel
