Subject: Power rate increase

Cancel

It is my understanding you will be considering a rate increase for Idaho Power due to the Bennett Mountain Power Plant and federal income tax expense. There are so many people employed facing higher property taxes, interest rates and cost of living expense and on top of that retired people on fixed incomes facing the same matters, it is difficult for me to see how you should consider extending a increase like this to the consumer. Idaho Power stock holders should be paying their own tax increase. The farmers should be doing their irrigating at the time of day when evaporation isn't so high and a further look at wind power would be more environmentally friendly than a power plant to further contaminate our state. There is enough wind along the Snake River there could be windmills to produce the power needed for the farmers. Hopefully my thoughts will be considered at the time of your vote.
