

To The Public Utilities Commission

Why should the general public pay part or all of Idaho Power's income taxes. Should not their stockholders have to pay some of it. No one pays my income taxes, no one pays my children's income tax.

Why should the public be expected to pay to build a power plant that will benefit Idaho Power, as they will sell power, make money, make more dividends for share holders. I thought most companies were responsible for building a business that will make them more money.

I don't mind paying a fair share but to pay for income tax and to build a business that will make the company more money is wrong as far as I can see.
