E-Mail: goodshepherd@velocitus.net
Company: Idaho Power
Comment_description: Madam/Sir:

Please do not allow Idaho Power to place a moratorium on wind generation of power. The US and Idaho needs all the electricity it can generate and we don't want to be dependent upon hydrocarbon fuel for power generation. Idaho power is trying, I believe, to make sure it's new power plant won't be usurped by wind generation. They will tell all that wind power is not always there, but it still has huge investments in hydro power. Tell me that is always there in these years of drought and shortage of water.

Be a great commission and insist Idaho Power continue to accept all power generated by wind or any other alternative source for the benefit of Idaho and the entire United States.

Thank you,

Raymond R. Hoem

Comment description: I support all alternative energy sources such as wind power and would like to see the PUC rule in favor of small wind farmers who are attempting to develop renewable energy for our state. It is vitally important that we decrease our dependence on foreign oil, for obvious reasons, and wind, solar, geothermal and other future power sources should be encouraged.

Thank you,

Lisa McMillin
