Comment_description: I think the 7.8% rate increase is way too large. In a period of record state growth and record profits, this rate increase is unreasonable. The multi-million dollar bonuses given out to Idaho Power's upper management should be taken back and used to finance the increased demand. More customers = more profit. Why not give them the raise state workers received last year, 1%.

Comment_description: How do you guys expect people on a fixed income to pay \$78.00 more a month for electricity? A person on SSI only get about \$603.00 per month, along with that they get \$32.00 in an AABD grant from health and welfare and about \$50.00 in Food Stamps, along with a once a year energy assistance totaling about \$130.00. That only goes to the company that provides heat. Last year you gave Intermountain Gas a rate hike that brought the gas bill up \$17.00 per month and now you want to give Idaho power a rate hike that makes the electric bill \$78.00 higher. Just exactly how are we suppose to pay that? If your heat is gas and mine is your electric bill runs around \$40.00 a mth. add \$78.00 to that and it's around \$100.00 and that the months when my gas bill with the thermostat set at around 62 or lower runs around \$70.00. Plus those aren't the only bills that have to be paid. I have to have a place to live after all.....
