Comment_description: To whom it may concern,
I fully support the purchasing of wind generated power by ID Power, and I urge the PUC to enter into whatever contract commitments are necessary to facilitate the construction of these wind generation sites. I have been adding 10 dollars per month to my electricity bill to the Green Energy Program for several years now in an attempt to put some money where my mouth is, so to speak. I can't wait to take my kids on a field trip to watch the wind turbines in action!! Thanks for your time, Chris

Comment_description: I believe Idaho should produce all of it's power within the state with our own resources, namely hydro, wind, and solar. I don't believe we need to rely on coal, nuclear, or natural gas, none of which our state contains. Hydro and wind are good baseline producers with solar as a great peak generator. We should use Germany as an example for ourselves. Thanks for allowing me to comment.
