Contact E-Mail: mertie2002@msn.com  
Name of Utility Company: Idaho Power  
Add to Mailing List:

Please describe your question or comment briefly:

I think it is outrageous that the utility company is allowed to reject paying the previous rate for energy generated by small wind farms. Global Warming is a crisis and this company is looking to spend hundreds of millions to invest in coal and nuclear but is sabotaging clean energy solutions. They are not representing the the citizens of Idaho but instead are being bought off by industries that are scrambling to find suckers that will let them into their state because everyone else is wisening up. Clearly the Public Utilities Commission is operating as business as usual. You scratch my back and I will scratch yours. Idaho has been able to maintain relatively clean air and water which in this day and age is a very valuable commodity. Wind, solar, geothermal, and biomass are the future..... Wake up Idaho Power!
