On February 6, 2007, Idaho Power Company (Idaho Power; Company) filed a Petition with the Idaho Public Utilities Commission (Commission) requesting authority to revise its published avoided cost rates for qualifying facilities (QFs) under Sections 201 and 210 of the Public Utility Regulatory Policies Act of 1978 (PURPA) to reflect Idaho Power's daily load shape and recognize the difference in value between energy delivered by QFs during heavy load hours and energy delivered during light load hours. The Company also recommends a proposed disaggregation prohibition for published rate eligibility. In addition to Idaho Power's filing in Case No. IPC-E-07-04, the Company on February 3, 2007, filed a Petition in Case No. IPC-E-07-03 to raise the published rate eligibility cap and to eliminate the 90%/110% performance band requirement for wind-powered PURPA QFs.
