Please describe your question or comment briefly:
I just recieved a letter from Idaho Power about the proposed rate increase. I was shocked about the breakdown on this increase. The residential seems ok, but the cause of my concern is about the proposed increase for small commercial. I feel that this puts the majority of their increase on the shoulders of small businesses. I own and operate a small auto service and repair shop- which was changed from residential to small commercial last year- I saw my bill go up about 30-45 dollars a month. Now it seems that I will again bear the burden of another increase. Small business owners already seem to take a large burden of covering costs and here comes another. I feel that the large commercial and industrial should have a larger increase and small business should be lower. When you take 15% of 7.39 it is a larger increase that 15% of 3.07. Please look at these ideas and comments, then make the appropriate adjustments. thank you, tony.

Please describe your question or comment briefly:

I recently received notice of their proposed rate increase. We fall in the 'Small Commercial' area. This is already the highest rate in their chart. I know we don't use as much electricity as 'Large Commercial' or 'Industrial' but they both have much lower rates. To me this is a prejudice against the 'Little Guy'. It seems to me a bit larger increase on their part would make it so that it was not necessary to give such a large increase to the 'Little Guy'. I also consider 'Irrigation' as one of the 'Little guys'. Thank you for listening to me. Anita Shore
