Please describe your question or comment briefly:

- 1 - Do not raise the power rates
- 2 - Seek out and encourage more ways to generate electricity like wind generators, but NOT COAL!!!!
- 3 - Upon getting this the additional electricity into the grid with no new rate hikes your need for water generated electricity should diminish some. If this should ever occur I ask that you request an opening at the Twin Falls power dam for a release of enough water so that the Twin Falls would once again be 'two falls'. This would enhance tourism and yet retain the hold back water for recreation and should still be able to power newer more efficient power generators.
