Please describe your question or comment briefly;
I think the power should be purchased at the lowest going rate. I have read the information provided by Id. Power with the my last bill. It would appear that the rate increase is a little bit more than the the clean air credit 77.5 million vs 76.7. Based on the table provided by the power company it would appear that I am losing most of my credit but still on the positive side. So I think their information is confusing as provided. Are they saying my base rate is going up 11.0% or .2419 cents and I retain my clean air credit of .3689 cents? I think the power company could have been a little clearer on their information.
Also water levels in Brownlee need to be regulated as to protect habitat for spawning fish and their fry.
thank you
Richard Rogers
