Subject: PUC Comment/Inquiry Form

A Comment from John Weber follows:

Case Number: IPC-E-07-18 order 30478
Name: John Weber
Address: 9535 W Cory Lane
City: Boise
State: ID
Zip: 83704
Home Telephone: 208-321-4998
Contact E-Mail: js_weber@hotmail.com
Name of Utility Company: Idaho Power
Add to Mailing List: yes

Please describe your question or comment briefly:

I will not be able to attend the workshop due to having to work. I would suggest this money be used to provide rebates for solar pv systems that are grid tied. Idaho Power's biggest power need (when power is the most costly) is in the summer months when solar naturally peaks during the long summer days. This is also at a time when hydro production is not naturally peaking. An added benefit to this peak power generation source is that the panels shade the roof reducing the ac load. This generation source will not require new transmission lines and has no transmission losses to speak of. Thank you for taking this into consideration.
