IN THE MATTER OF THE )  
APPLICATION OF IDAHO POWER )  
COMPANY FOR AUTHORITY TO )  
INCREASE ITS RATES AND CHARGES )  
FOR ELECTRIC SERVICE )

Case No. IPC-E-08-10

**DIRECT TESTIMONY OF KEVIN C. HIGGINS**

**On Behalf of The Kroger Co.,**

**Doing Business as Fred Meyer and Smith's**

**October 24, 2008**

Higgins, Di  
Kroger

1 economic and policy analysis, including evaluation of electric and gas utility rate  
2 matters.

3 Prior to joining Energy Strategies, I held policy positions in state and local  
4 government. From 1983 to 1990, I was economist, then assistant director, for the  
5 Utah Energy Office, where I helped develop and implement state energy policy.  
6 From 1991 to 1994, I was chief of staff to the chairman of the Salt Lake County  
7 Commission, where I was responsible for development and implementation of a  
8 broad spectrum of public policy at the local government level.

9 **Q. Have you ever testified before this Commission?**

10 A. Yes. I testified in Idaho Power's 2007 general rate case, Case No. IPC-E-  
11 07-8, and in its 2003 general rate case, Case No. IPC-E-03-13.

12 **Q. Have you testified before utility regulatory commissions in other states?**

13 A. Yes. I have testified in over one hundred proceedings on the subjects of  
14 utility rates and regulatory policy before state utility regulators in Alaska,  
15 Arkansas, Arizona, Colorado, Georgia, Illinois, Indiana, Kansas, Kentucky,  
16 Michigan, Missouri, Minnesota, Montana, Nevada, New Mexico, New York,  
17 Ohio, Oklahoma, Oregon, Pennsylvania, South Carolina, Utah, Washington,  
18 Virginia, West Virginia, and Wyoming. I have also filed affidavits in proceedings  
19 at the Federal Energy Regulatory Commission.

20 A more detailed description of my qualifications is contained in  
21 Attachment A, attached to this testimony.

Higgins, Di

Kroger

1 **Overview and Conclusions**

2 **Q. What is the purpose of your testimony in this proceeding?**

3 A. My testimony addresses the proposal by Idaho Power to introduce time-of-  
4 use (“TOU”) pricing for Schedule 9 customers taking service at either primary or  
5 transmission voltage.

6 **Q. What conclusions have you reached in your analysis of Idaho Power’s**  
7 **proposal to introduce TOU rates for certain Schedule 9 customers?**

8 A. I recommend adoption of the TOU rate design proposed by Idaho Power  
9 for Schedule 9 customers taking service at either primary or transmission voltage  
10 (Schedules 9-P and 9-T). Currently, TOU rates are not available to Schedule 9  
11 customers. The Company’s proposed rate design improves the price signals for  
12 Schedule 9-P and 9-T customers and is responsive to the directive in the  
13 Commission’s Order issued in Case No. IPC-E-07-8, in which the Company was  
14 instructed to develop a time-of-use rate proposal for Schedule 9 customers.

15  
16 **Idaho Power’s TOU Rate Design for Schedules 9-P and 9-T**

17 **Q. By way of background, please describe the type of service that is available**  
18 **under Rate Schedule 9.**

19 A. Schedule 9, Large General Service, is generally available to customers  
20 with monthly energy usage in excess of 2,000 kilowatt-hours and billing demands  
21 less than 1,000 kilowatts. The rate schedule contains pricing provisions for  
22 service taken at secondary voltage (9-S), primary voltage (9-P), and transmission  
23 voltage (9-T).

Higgins, Di

Kroger

1           In the Idaho Power tariff, Schedule 9 is situated between Schedules 7 and  
2 19. Non-residential customers with energy usage less than 2,000 kilowatt-hours  
3 per month are generally served under Schedule 7, Small General Service, whereas  
4 customers with billing demands of 1,000 kilowatts or more generally take service  
5 under Schedule 19, Large Power Service.

6 **Q.    How are Schedule 9-P and 9-T rates currently structured?**

7 A.           The Schedule 9-P and 9-T rate components are comprised of: (1) a service  
8 charge, which is a monthly customer charge; (2) a basic charge which is billed on  
9 a demand basis; (3) a seasonally-differentiated demand charge; and (4) an energy  
10 charge that also is seasonally-differentiated.

11 **Q.    How does the design of Schedule 9-P compare with that of Schedule 19-P?**

12 A.           With the exception of the energy charge, Schedules 9-P and 19-P are  
13 nearly identical. Schedules 9-P and 19-P have the same service charges, basic  
14 charges, and non-summer demand charges. The summer demand charges are also  
15 identical, except that the Schedule 19-P summer demand charge is divided into an  
16 on-peak and a non-peak component (the sum of which is equal to the Schedule 9-  
17 P summer demand charge).

18           The big difference between the two rate schedules occurs in the design of  
19 the energy charge. Currently, the Schedule 9-P energy charge has no TOU price  
20 differentiation. It is a flat energy charge that does not vary with the hour of the  
21 day in which energy is consumed. In contrast, the Schedule 19-P energy charge is  
22 differentiated into three time periods in the summer (on-peak, mid-peak, and off-  
23 peak) and two time periods in the non-summer months (mid-peak and off-peak).

1 **Q. How does the design of Schedule 9-T compare with that of Schedule 19-T?**

2 A. The relationship between Schedules 9-T and 19-T mirrors that of  
3 Schedules 9-P and 9-T, described above.

4 **Q. What rate design has Idaho Power proposed for Schedules 9-P and 9-T in  
5 this proceeding and how does it relate to that of Schedules 19-P and 19-T?**

6 A. As explained in the direct testimony of Idaho Power witness Darlene  
7 Nemnich, the Company is proposing to bring the designs for Schedules 9 and 19  
8 even closer together for customers taking service at primary and transmission  
9 voltages. For customers taking service at the same voltage level, the demand  
10 charges would be identical for Schedules 9 and 19 – including the on-peak and  
11 non-peak components in the summer demand charge. And significantly, the  
12 energy charges for 9-P and 9-T would move from flat energy charges to a TOU  
13 design.

14 **Q. What is your assessment of the Company's proposed changes to the design of  
15 Schedules 9-P and 9-T?**

16 A. I support Idaho Power's proposal. The introduction of TOU pricing for  
17 these customers will improve the price signals they receive and better align cost  
18 recovery with cost causation within the rate schedule. The proposal is also  
19 consistent with the instructions issued in the Commission's Order in Case No.  
20 IPC-E-07-8, in which Idaho Power was directed to "develop a time-of-use rate  
21 proposal for Schedule 9 customers and present it to the Commission." The Order  
22 further specified that "Idaho Power should include the Schedule 9 customers in

1 that process, and if possible, present a proposal that is agreeable to the Schedule 9  
2 customers.” [Order at 9.]

3 **Q. Are you familiar with efforts by Idaho Power to include Schedule 9**  
4 **customers in the process of introducing TOU rates?**

5 A. Yes. Idaho Power invited Kroger and other Schedule 9 customers to  
6 discuss different approaches for introducing TOU rates for Schedules 9-P and 9-T.  
7 The Company solicited input from Schedule 9 customers and has been responsive  
8 to Kroger’s feedback.

9 **Q. What are the benefits of TOU pricing?**

10 A. Energy costs vary across the hours of the day, with the most expensive  
11 hours typically occurring from the late morning to early evening. Designing the  
12 energy price to end-use customers to reflect these variations in energy costs sends  
13 the proper signal to customers regarding the relative cost to operate the system  
14 during the peak, mid-peak, and off-peak hours. Customers can then use this  
15 pricing information to alter their discretionary patterns of usage, increasing  
16 efficiency and lowering the overall cost of energy to the system.

17 **Q. Are there other reasons besides economic efficiency to make TOU rates**  
18 **available to Schedule 9-P and 9-T customers?**

19 A. Yes. In addition to providing these customers with an incentive to better  
20 respond to price signals, TOU rates will ensure that these customers pay rates that  
21 are more closely aligned with the costs they cause. Basic fairness dictates that  
22 customers whose patterns of energy consumption are less expensive to serve  
23 because of their load pattern should see that lower cost reflected in their bills.

1           Moreover, the introduction of TOU rates for Schedule 9-P and 9-T  
2 customers will improve the already close alignment between these rates schedules  
3 and Schedules 19-P and 19-T, further smoothing the transition for customers who  
4 may move between Schedules 9 and 19 as their usage level changes.

5 **Q. Please summarize your recommendation to the Commission on this issue.**

6 A.           I recommend adoption of the TOU rate design proposed by Idaho Power  
7 for Schedule 9 customers taking service at either primary or transmission voltage.  
8 The Company's proposed rate design improves the price signals for Schedule 9-P  
9 and 9-T customers and will ensure that these customers pay rates that are more  
10 closely aligned with the costs they cause. Further, the introduction of TOU rates  
11 for Schedule 9-P and 9-T customers will more closely align their rates with  
12 Schedules 19-P and 19-T, improving the transition for customers who may move  
13 between Schedules 9 and 19 as their usage level changes. Finally, the proposal is  
14 consistent with the instructions issued in the Commission's Order in the previous  
15 Idaho Power rates case, in which the Company was directed to develop a TOU  
16 rate proposal for Schedule 9 customers that included the Schedule 9 customers in  
17 the process.

18 **Q. Does this conclude your direct testimony?**

19 A.           Yes, it does.
