Please describe your comment briefly:

Idaho Power is Asking for a 6.3% increase in their rates for residential cutomers. That would be the second increase to Idaho power in less than a year. It seems as though Idaho power shows no sign of tightening their belt ie. the number of empolyees with cell phones. The meter readers driving around in trucks not fuel efficient cars. The continued hardship we face to pay additional monies to Idaho Power while they continue to spend money in some cases wastefully is not right

The heart of their increase is for growth! Let the developers pay for their growth. If there is not enough natural resource for power then growth should be looked at closely. As other utilities and resources are at risk to those of us already living here.

You give me enough time and money and I'll have a substantial reason for a decrease in our electric rates.
