Ms. Jean D. Jewell, Secretary  
Idaho Public Utilities Commission  
P. O. Box 83720  
Boise, ID 83720-0074

RE: Case No. IPC-E-08-11, Order No. 30760 Compliance Report  
Appropriate Disposition of SO<sub>2</sub> Emission Proceeds for Energy Education Proposal

Dear Ms. Jewell:

Enclosed please find Idaho Power's summary report on the disposition of SO<sub>2</sub> Emission Proceeds for Energy Education. This report is filed in compliance with the directive stated in Idaho Public Utilities Commission Order No. 30760, which ordered that \$500,000 in SO<sub>2</sub> proceeds, plus accrued interest, be used to develop and implement an energy education project.

As you will see in the report, the Company established the Students for Energy Efficiency Community Advisory Group (SEECAG) to facilitate the disbursement of funds for the development and implementation of an energy education project. As guided by the SEECAG, Idaho Power developed an elementary and secondary program to educate and promote energy efficiency for Idaho students in the Idaho Power service territory. The program allows the students to use their skills in science and math to evaluate where energy consumption improvements can and should be made. The program, consisting of an elementary component (Energy Wise Program) and high school component (Students for Energy Efficiency Program), was developed and implemented for two consecutive academic school years.

Enclosed with this cover letter are an original and three (3) copies of five separate documents: 1) Idaho Power Company's SO<sub>2</sub> Emissions Allowance Energy Education Program summary report; 2) 2009-2010 Energy Wise Program Summary Report; 3) 2010-2011 Energy Wise Program Summary Report; 4) Fall 2009 Students for Energy Efficiency program workbook; and 5) Fall 2010 Students for Energy Efficiency program workbook.

If you have any questions regarding this filing, please contact John Bernardo at 388-5543.

Sincerely,

Mike Youngblood  
Manager, Rate Design
