Contact E-Mail: [rickporterfield@cableone.net](mailto:rickporterfield@cableone.net) Name of Utility Company: Idaho Power Add to Mailing List:

Please describe your comment briefly:

Decisions for a program costing \$12.2 million, relying on temporary periods of time that a company reduces usage or refrains from use, should be made in light of other options, too. One such option, now at least somewhat affordable to even small businesses, is line conditioning that utilizes new but reliable technologies that reduce the consumption levels of inductive loads continuously. Idaho Power should perhaps show their awareness of such technologies and awareness of how these could be introduced in the commercial and industrial environment.
