Please describe your comment briefly:

I'm in favor of Idaho Power building the gas-fired power plant south of New Plymouth. We are in the need of more power and from different types of plants. I do have one major concern of Idaho Power building this plant which is when the peaker plants built in Mountain Home were built with out of state contractors and out of state people and if we are going to have to pay Idaho Power for the bill for building this plant, I believe that we should get to build it with Idaho Contractors and Idaho Workers. We have more than enough qualified workers that don't have jobs at this time in the state to complete this project. Our construction contractors need work to bid on so they can put their people to work. I don't know if the PUC can help with this but I would like to see them try to have Idaho Power employ Idahoans for the construction jobs. We are all supportive of "Buy Idaho" so why don't we "Build Idaho".
