Please describe your comment briefly:

I just read in the newspaper that Idaho Power has requested another power increase. This is on the tail of a previous rate increase. Are they going to increase our utilities like the oil companys are raising the price of gas even when the barrel price of oil is not going up. Idaho power complains they need the money to pay for meters and other equipment. It appears to me that this company needs to budget their monies compared to just spending and charging the communities they serve. Let us remember that the customer is right and I believe the customer is not being served with this rate hike.

I know for a fact Idaho Power gave bonuses and raises this year but are now seeking a rate increase. That is not right with the economy in the condition it is. If they have the funds to issue bonuses they do not need any more of my money when I am struggling to make the house payment due to pay cuts.

Enough is enough! Please do not give Idaho Power another rate increase. I cannot believe all of the increases they have already had. Every time we turn around, they are trying to get another increase. I feel they are taking advantage of being the only source of power we have. Enough is enough!

Idaho Power

The Public Utility commission has granted Idaho power three rate increases and now they want another ?

How can this company charge it's customers three times for the KWh used in one month???

Non-summer Energy Charge 0-800 KWh

Non-Summer Energy Charge 801-2000 KWh

Non-Summer Energy Charge 2000 KWh

Can you tell me how this company is allowed to charge like this.

Where does this end????

Idaho Power needs to realize that we are in a recession. We can't just come up with another 4% or 10% or 11%. Most of us feel lucky to have a job. We are not expecting a raise in our pay anytime soon.

Idaho Power should cut back the same way we have. Please consider the plight of the customers when you review this latest request from Idaho Power. Thank you.

Please describe your comment briefly:

I understand this filing and others related to it would raise residential rates an average of 11.4%. THAT'S ELEVEN POINT FOUR PERCENT. The company evidently states that it 'made a mistake' and undercharged previously, and now, with this recession, wants to ride the backs of the public.

I'm generally supportive of increases, but this is outrageous. The company should have to eat most of this, and I don't think it will hurt them at all.....they've lived like GM for a long, long time. JL

Please describe your question or complaint briefly:

Idaho Power rates are getting out of control. The thing that people dont understand is that the rate increase for most homes is only around \$8.00 month which is fair. But the rate increase for farmers will raise my pumping bill est. \$70,000. As a future Farmer I demand that you put and end to the rate hikes. If you dont there is NO future for Farms here in Idaho, which is sad.

The other thing that I just dont understand is why do they raise rates on pumbers? We constantly use the same amount of power every year almost. The reason seems to me is there are more people moving here so why not raise the rates on what is causing Idaho power to have to buy power which is Residential? Or are you afraid of a real outburst? I plead with you. Put an END to these monthly/yearly rate hikes, your destroying the future of Idaho.

Regards, Andy Larson

Please describe your comment briefly:

I see Idaho power is trying to gouge us again for more money. They say they have to because of the water this, which is a bunch of baloney and they know it. We have above normal water this year so they can use ther Hydroelectric dams and also the price of Natural gas has plummeted to an all time low, if anything Idaho Power should get a rate decrease. I wanted to also know why are the rate payers not getting rent from Idaho power on all the equipment we have had to pay for for there use to charge us more money. If we have to pay for equipment they purchase then I consider this to belong to the rate payers not Idaho power and we should be compensated for there use. I don't understand why we have to pay for equipment they purchase anyway, if you went to a garage and they said before they could fix you're car you would have to by a tester for them to use and keep but you would have to pay for it, you would tell them to stuff it and leave. The same should apply to Idaho power. So I want to know what is going on here Idaho power has had several rate increases in the last year and that is enough it is time to stop the price gouging.

Please describe your comment briefly:
Dear Public Utilites Commission:

If you agree to the 11.4% increase request by Idaho Power you are as guilty of committing the same sin as the Executives that allowed several million in bonus's to the AGI employess after they received federal bailout money. If you believe we are in a low water year please check with the local water masters because it simply is not true. What a hoax. If you allow this then shame on you too!

Please do not allow this increase to happen.

I sent the following letter to Idaho Power:

Shame on you! I read in the local paper about your requested increase. You are no different than GM or AGI. I loved the comment that you say we are in a decreased water flow year. Shame on you! That is simply not true. You know it, I know it and so do all the water masters in the state. My utility bills at my business's and my home increased about 30-40% last year. Not your simple little amount you say you got. Of course they are all hidden within your 'new billing' statements.

Have you no shame. A good friend of mine works for your company and complains constantly about how the workers he supervises are lazy and wasteful of your companies time and resources. I know as a builder developer the service I got 20 years ago was by far much more respectful, efficient and productive than what I have received lately - especially in the last 5 years.

Perhaps you too think that you can continue business as usual - much the same as AGI and GM and a myriad of other wasteful big companies. I think the Public Utilities commission should deny your increase and you should be forced to actually have to look internally like every other business has to do in these difficult times

Disappointedly
Tari Jensen

Wouldn't it be nice if every business could adjust their rates as often as Idaho Power does? In these tough economic times you would think they would have a little compassion for their customers. It is just too bad we do not have the option of going to another power supplier.
