Subject: Consumer Complaint/Inquiry Form

A Complaint/Inquiry from Mike Standlee follows:

Name: Mike Standlee
Contact E-Mail: lnelson@standleehay.com
Daytime Telephone: 208-825-5117
Home Address: 826 S 1700 E
City: Eden
State: Idaho
Zipcode: 83325
If this concerns a Business, Business Name:
Business Address:
Business Phone:
Name of Utility Company: Idaho Power
Have you contacted the utility regarding your concern?: yes

Please describe your question or complaint briefly:

With the financial crisis affecting several businesses and house families this is a very sensitive time to raise rates again. The local dairy industry in the dumps makes the farm industry with difficult times as well. Standlee Hay and other businesses has made difficult decision saving costs to stay in business and it seems that Idaho Power should have to do the same. I have attached power bill history of our companies. Our company has made drastic changes decreasing prices to our customers and it is difficult to see Idaho Power being able to charge guaranteed margins with little accountability. I find it amazing to hear you and Idaho Power say Idaho is still one of the less cost for power in the US. I am asking the PUC Members to turn down this request until the financial crisis is more in order of all companies and family homes.

I have spent over 3 million dollars with Idaho Power in the last three years. Please help.

Mike

Please describe your question or complaint briefly:

In concern of Idaho Power rate increase request please refer to the matter of the commissions inquiry about Energy affordability Issues and workshops dater Jan. 16, 2009. Even out State Legislature didn't want to raise taxes of the residents or the busines's due to the state of the Economy. Please do not grant any increase. Ask Idaho Power to operate more efficently. I drive to Oregon every week, the Snake River has been running at near record levels but the water level at Farewell Bend has not raised. Why isn't Idaho Power storing water in the Hells Canyon Dams for Summer hydro generation? I guess they know that the commision will ive them whatever they want no matter what the cost. The waters levels were high last year too. Natural Gas prices lowered last year. The cost of generating electricity should be lower.

I know that the power demands keep increasing mostly out of State. I would llike to see the Power rates reduced here and if needed increase to the out of Stte new connections.

Harold Waters
