Contact E-Mail: nordic399@msn.com
Name of Utility Company: Idaho Power
Add to Mailing List: yes

Please describe your comment briefly:

I read on KTVB.com that the State is looking for input about purchasing wind power. I believe we should get on board with this. Wind power will be supplying about 20% of the countries power by about 2030. Let's get on board with this to get somewhat ahead of the game. This type of 'power' is very clean and very needed in this day and age. We are going to see our fossil fuels used up, maybe not in our lifetime, but possibly in our childrens lifetime. Do we want to see them suffer because we did not act upon this amazing thing called 'Wind Power'? Let's do this, and do it big!!!! Only good things will come from this great creation!!!

Contact E-Mail: Hankdole@yahoo.com
Name of Utility Company: Idaho Power
Add to Mailing List: no

Please describe your comment briefly:

In regards to Should Idaho Power buy wind energy? State wants to know. I think that Idaho power should start investing/installing their own wind farms and solar power systems and buy it from developers, but only if it is at a competitive price. Renewable power is what we need to invest in.

Please describe your comment briefly:

Why wouldn't the PUC just invest in building our own wind power stations nearby in the Treasure Valley area. The state needs to begin utilizing the constant winds near the Snake River for Ada & Canyon Counties.

Today's article in the Times News said that the PUC is taking comments about wind power. Idaho needs wind generation for energy and for job production. Go wind!

Please describe your comment briefly:
I think that Idaho Power should DEFINITELY buy wind energy from the new Hagerman wind farms. Coal, the leading greenhouse gas contributor, can be replaced (in part) with wind - an affordable, inexhaustible source of energy that creates no pollution, no waste, and no natural resource depletion! It is ridiculous to me that we don't use more wind energy already. It would also boost our local economy by creating more jobs. Please please please please PLEASE advertise this proposal heavier. Try and get more community members to take a closer look at this idea and make this comment form easier to find on your page! I will do my part in getting people to respond to you with their input. Thanks for listening.

Add to Mailing List: no

Please describe your comment briefly:
Electricity generated by wind is just fine, as long as it isn't more expensive than what we pay for power from other sources. But don't do it just because it popular in some circles or is politically correct.
