Please describe your comment briefly:

Citizens Protecting Resources, Inc., is in favor of the proposed wind power generation facility, and fully supports such. We are pleased to see another wind power generation project being constructed in Idaho, and encourage the construction of wind projects, as they are among the most environmentally friendly, 'green' power generation methods available. Thank you for your consideration of our comments.

Please describe your comment briefly:

I am in full support of the Sawtooth Wind Project. Investing in wind and solar sources will help Idaho reduce dependence on natural gas and hydroelectric, not use or dirty our water like turbines and nuclear generators and of course we will be doing a small bit towards reducing green gas emissions. From what I understand integrating wind power onto the grid can be done reliably and cost effectively with low maintenance in the long run.

Do the right thing and join the 82% of Americans who support wind projects in their hometowns, according to a 2009 Saint Index survey.

Thank you for your consideration,  
Jenn Siegel

Please describe your comment briefly:  
To Whom It May Concern:

I am writing to urge the commission to adopt the proposed wind project called the Sawtooth Mountain Wind Project. There is a real need for good clean energy in this state and in the good ole USA.

There is plenty of wind in this part of southern Idaho and it should be put to good use. I realize that it could be a little costly initially, but in the long haul it will be a great benefit to the farmers, ranchers and households in the area.

Thanks for your willingness to consider the project and give it your overwhelming support.  
Sincerely

To whom it may concern:

I am a resident of Twin Falls Idaho and I am excited about the proposed deal with Idaho Winds LLC. I think that it would be the best use of all that wind. Go for it Idaho Power!!!
