Please describe your comment briefly:  
I have concerns about the request for Fixed Cost Adjustments (FCA). I already pay a fee for a service charge, Power Cost adjustments, Franchise Fee, and Energy Efficient Services on top of my energy usage. The FCA appears to either be an additional charge for Energy Efficient Services or Energy Efficient Services is too effective. Either way I think Energy Efficient Services needs to be looked at and re-evaluated; not another fee added.

Please describe your comment briefly:

This seems to be about a way for all of us to pay for their bad judgement. I have seen this slide through in other states. I have NEVER heard of customers getting a credit. They begin a program to help people use energy efficiently so that our utility cost don't increase, then because the rate usage is down they scream they aren't getting enough capital, so we pay for it either way. (They scream everyone is using too much energy, so we all cut back, then they would scream they aren't getting enough money, so they would get a rate hike.) I am disable because of a heart attack, My income is fixed. There were no social security increases this year, but my costs increase in the form of taxes and medicare premiums. I attempt to lower my expenses including utilities but if this works the way it seems my cost go up anyway. I might as well live in the dark. Please say NO to this increase, Particularly in these economic times.

Please describe your comment briefly:

I do not approve of any of the rate increases for the following:

There names are as follows:

1. Fixed Cost Adjustment (FCA)
2. Advanced Metering Infrastructure (AMI)
3. Pension Funding Especially #3 in these hard times for all families. It's just wrong.

The other 2 are the cost of IP doing business, and should be absorbed by investors, not an open credit card for bad business. They have only hurt rates in other states, let's not do it in Idaho.

Thank you for your time.

Please describe your comment briefly:

I am writing with regard to proposed rate increases by Idaho Power. I want to express my opposition to such increases, which will be used to fund pensions for IPC employees and to offset reduced usage due to the focus on energy savings. I feel that IPC, like any other business, should be subject to the ebbs and flows of business and should not be able to simply increase rates (dramatically in this case) to resolve business challenges they may face. It's one thing to have a small increase due to cost of living but to make major increases (179 to 200%) is outrageous and I adamantly oppose such increases.

Please describe your comment briefly:

The rate increases being requested are absolutely NOT appropriate at this time of financial stress. Why can't they reduce costs or profits on themselves like the rest of us are having to do, rather than just passing them on to us because they think they can?
