Re: IPC-E-10-07

IDAHO PUBLIC
UTILITIES COMMISSION

Dear IPUC Staff:

Citizens Protecting Resources (CPR) is a nonprofit, grassroots organization of Magic Valley citizens. Protecting and conserving resources and quality of life issues are CPR's primary focus.

CPR strongly supports energy conservation programs by Idaho Power Company (IPC) and others. We believe the only way to ensure an aggressive and effective conservation program by IPC is to make it slightly more profitable for them to save electricity than it is for them to produce and sell more power. CPR does not have the expertise to determine whether .39 percent or some other percentage is appropriate but we do support the concept in IPC-E-10-07.

Thank you for providing the opportunity for public comments.

Sincerely,

Carl H. Nellis
President
Citizens Protecting Resources
42 West 600 South
Jerome, ID 83338
