Please describe your comment briefly:

' The Idaho Energy Education Project believes that a portion (8%) of the customers share from the sale of SO2 credits by Idaho Power should be invested in energy efficiency and education so that there might be a continuing benefit of reduced SO2 emissions. Though the pilot energy education program facilitated by Idaho Power with customer SO2 funds has only finished it s first year, substantial energy savings were identified via student audits. Many of our schools districts have declared economic emergencies and so there are not the funds available to implement those savings. Using a portion of SO2 sales funds for the purpose of implementing the energy efficiency upgrades would be in the long term public interests. This would not mean a mere spending of those monies, but a return on that investment over the long run.'

I want to express my support for the Idaho Energy Education Project.  
This represents forward thinking - the type we need more of.
