With Many of us out of steady work....

I don't know how you can ask for more money.

Our services have not changed except for continued increases.

I would gratefully like to see suggestions of how a person could cut back on services with use of green technology that would be offered at an affordable rate. Alternative resources are not offered to everyone who could and would benefit from such information.

People should not be forced to live without power, heat/air, clothes machines, dishwashers, and other normal amenities.

I have gone with out many most of the time to cut monthly bills when my power was reduced my bills still went up - not right in my book.

Why should I pay for the 24 hour business, machines,lights,ac /heat, and many other unknown items that raise costs every year?

Why don't you hit up the ones who are really abusing the power?

Empty Government offices- warehouses, stores, Medical offices, empty lease or rentals, schools after hours,restaurants, responsibility and accountability. (Just like at home.) If its 24 hour place then they should pay 24hour usage no breaks.

Not in use - turn it off - start charging places.

This is the wrong time to be raising rates; like many Idahoans, I am struggling to pay my bills already. I am definitely opposed to the Fixed Cost Adjustment. Make Idaho Power present its case each time it wants to raise rates.

Why do we need a price increase just so they can make more money.

How much profit do they think they need. This is the problem with big companies, all they want is more, more and more.

I have not had a c.o.l.a. in over 2 years, but that doesn't matter as long as they make lots of profits.

Please describe your comment briefly:

I haven't worked a job in 3 years, so cold hard cash in my house is more rare than anything. Most of the people I know from my last place of business don't earn what they used to. Combine this with the reports that unemployment is higher in Idaho than the rest of the national average and this is, most assuredly, the wrong time to institute higher costs with out the citizens having an alternative method of procuring power for the necessities of this 'modern era', when food spoils, and alarm clocks don't work with out power. I don't mind paying folks a fee for the services that they render, but having only one provider of power who is a private contractor and can increase prices at nearly a whim is akin to extortion.(eg. a monopoly,) I'd prefer a set fee based on previous years consumption with over usage fees tacked on. Better yet, give me ways and means to build power generation devices and let me feed back in to decrease my bill. That's the original American way of doing things -- people helping people.

I respectfully request that the case referenced to above not be passed. My husband and I live on a very fixed income. We have never asked nor receive and public assistance, however if the utility companyies are allowed to charge this outrageous price hikes people like us would not be able to pay their bills. My husband is disabled (Parkinson's Disease) and needs to be in a comfortable safe environment. He and I have worked hard all our lives and have always been self efficient but ENOUGH IS ENOUGH!

Come on people - how much more do you think your consumers can take - no jobs, people losing their homes - barely ekking by - how can you possibly consider raising rates when 95% of all your consumers are struggling to make ends meet - cut costs on your end like every household in Idaho has had to do since 2008 - Join the people you share living with in this state. Rather than try to 'increase your profits' spend your time trying to figure out how YOU can lower your expenses and tighten YOUR belt like we all have had to do.....ENOUGH!

Our economy is not recovering as the prognosticators have said it would. Now is not the time to foist higher rates on utility consumers. We are retired and have not seen any cost of living adjustments for more than two years. Why should utilities get rate hikes when we have to make do with fixed incomes? Tell Idaho Power to live on their present income the same as the rest of us have to do.

Honored Commissioners, My wife and I are 70+ years of age, living on limited income, in dire economic times, having lost multiple dollars in our small investments due to immoral actions by Wall Street, banks, etc. We also have multiple medical issues which increases our necessary expenditures, even with our Medicare (which a partisan party wants to modify and/or take away from us). And now Idaho Power wants to: increase our rates by 8.83% (we haven't had a Social Security increase for approx. three years); add a 'Fixed Cost Adjustment' and increase their Customer Service charge by \$1.00. Commissioners, this is the wrong time to increase rates. We **IMPLORE YOU** not to permit Idaho Power and other Utilities to increase their rates until such time as our economy recovers and progresses to higher than our Utilities want to increase their rates. Thank you very much, Commissioners!

Regarding the pending case of a very significant rate increase for Idaho Power, I wish to go on record in opposition to this increase. In these very difficult economic times, it would be adding insult to injury to ask people who are already in dire straits to pay more just so Idaho Power can make more money for their shareholders and increase wages for their employees. This simply isn't the time to raise utility bills for the necessities such as power and water when people are struggling to put food on the table. Thank you.

The preservation of our Earth Mother's resources has been THE MANTRA for generations; protecting our resources from overuse as well as reducing costs for both the consumer and the producer of utilities. Now, Idaho Power, a member of 'Corporation's America' has the audacity to impose a 'Fixed Cost Adjustment,' which will automatically shift any shortcomings in energy sales on Idaho consumers, while always guaranteeing Idaho Power and its investors a profit. Meaning, the LESS electricity I use the more I could end up paying. WHAT??? It's time that the IPUC STOP this outrageous corporate greed/consumer abuse.

I am retired and on a fixed income. Have had no cost of living increase for several years. We are coming in to winter with higher power usage and I cant afford another utility increase at this time. It comes down to a choice of staying warm or buying medication. The outcome to our health is the same. It costs more to stay alive. I vote NO to a rate increase. If I could give myself a pension increase I would do it. Times are tough and utilities don't deserve a high rate of return during this financial crisis.

Please describe your comment briefly:

One of the problems that this Country has and has had for a long time, is that people seem to be real greedy and greed breeds greed, and folks, time are tough and we are all in the same boat, and it is sinking, so wake up, and forget your raises and employee raises for a long long time, until things get back to a definate maybe.

We are all going to have to tighten our belts and this means Idaho Power and everyone else, so get a clue and forget any and all raises in the future.
Any Normal person already knows this, so lets all get on the same page and help one another. We do not do that by price gouging and raising prices to give raises etc. There is no money and we sure cannot print it at our homes, so it is pretty obvious what does and does not need to happen.
Have a great day

Bob Belanger Sr. (Retired)

Please describe your comment briefly:

We strongly oppose the rate hike, especially in this economy. As fixed income retirees, who try to conserve energy, this proposal is a penalty. The Idaho Power Company should take the risk of a loss just the same as they take the gain of a profit. In a time of surplus water and energy, they should be making a profit based on their sale of surplus energy. Asking for an increase at this time penalizes those who try to save energy and partake in energy saving programs. This is a total disincentive to partake in energy saving programs and is preceived as greed on the part of Idaho Power.

Please describe your comment briefly:

This is not acceptable, we should be rewarded for keeping our bills down instead of getting rate hikes!! It is too difficult already to keep the most minimum bills covered with the low pay Idahoans receive!! I personally have weathered the storm of retaining my home even with the struggle to stay employed these increases could possibly cause me to finally be pushed over the threshold of losing my home, I have such a small food budget already, however, the only place I can cut from would be food, as I am sure this is the case for many Idahoans why does Idaho power need to make a profit when I can barely eat? My food budget is only \$100 per month.

Now is a particularly bad time for a rate hike, for adding other fees, or increasing service charges. People on fixed incomes are already struggling, and to add to their burden is unconscionable.

When times are good, everyone should benefit, but when times are hard, everyone should share the burden.

Please describe your comment briefly:

Idaho Power has instituted options, ie Summer Rates and Winter Rates in an effort to charge customers for their usage. This rate increase is not acceptable because they are trying to recoup loss of income from the current fiscal catastrophe. It is not my fault that many of the homes serviced by them are in default. It is simply a bad business decision on their part to expand their operation beyond reasonable possibility of return for their investment.

I do not support this rate increase.

I'm a paying customer who pays my bill in full and on time. Don't ask me to support Idaho Power's misjudgement.

Thank you,

Fritz Kindberg

As a self employed individual trying to keep my head above water with utility bills, food, medical cost, insurance and a mortgage, I think it is alarming to see any hike in rates. All small private business have had to cut their overhead, reduced their profit margin and taken pay cuts to stay 'open for business'. My question to the legislators and the utility companies is Why can you not do the same in the struggling economy? It is absolutely appalling to see this even suggested. If this is passed it truly shows that you (legislators and big business) are not wanting to or care to share in the economic hardship but rather become a group of self serving selfish and uncommitted to the masses elites.

I am opposed to any utility rate increases, especially now with the current state of economics, and do not want to see language in any legislation that would allow automatic increases to rates at any time for any reasons. There is a process used for this that does not require electric and water customers to be unfairly charged for poor management on the part of utility companies.

Please describe your comment briefly:

I wish to comment on the above referenced proposal by Idaho Power Co raise their rates by 8.3% to the general public which includes the hard hit consumers in this present downturned economy. The worst part of their proposal is the ability to place the burden of their bad energy investments and losses upon those likely to be able to generate any extra funding to pay the increased bills. This should be spread on the larger users as well. Please do not put these burdens on citizens who are already at a disadvantage in this bad economy. It is realized that Idaho Power needs increases in revenues as we all do. Please do not allow this large of an increase as they are asking for the limit most likely expecting a compromise.

Please describe your comment briefly:

Idaho Power has many 'gimmicks' to increase their profit. They 'adjust' our rates when water is down, but as was the original agreement, they DO NOT always adjust downward when water is high, nor do they ever return to the original level therefore we get increases on top of increases...double jeopardy. While most areas are rewarding customers for less usage and strain on the system, Idaho Power has gotten and still requests INCREASES FOR LESS USAGE. Therefore conservation is PUNISHED....Idahoans really aren't this stupid. Lower usage should be rewarded. As a monopoly, Idaho Power need to respect the citizens it serves. Lower profit levels for whater reason needs to be primarily passed on the stock holders or we need a PUBLIC company not held by stock holders!

Finally, let's remember than most Idahoans are living paycheck to paycheck or unemployment check to unemployment check...these are the voters...they CANNOT afford these increases to line the pockets of out of state stock holders. THE PUC NEEDS to remember who is paying THEIR paychecks! Hopefully is isn't getting funds from the utilities illegally! People will not take this forever and we are smart enough to read the brochures in the bill! Idaho Power is a joke to put it lightly...increases on the previous increases...we get it. We also get contacting politicians on PUC members!

Please describe your comment briefly:
Idaho Power needs to hold off on any rate increase for at least 12 months and the Idaho Utility Commission needs to make sure that happens.. We had a very good water year and much of our electricity comes from hydroelectric, so why is Idaho Power looking for another increase when they are currently providing the cheapest electricity possible. People are already having trouble paying their utility bills because of the poor economy and lack of jobs. The last thing we need in the Boise area is another rate increase on top of the last increase which went into effect not long ago. I hope the Idaho Utility Commission does what is best for Idaho residents and denies this request for a rate increase by Idaho Power. The only people who will benefit from a rate increase will be the Idaho power shareholders.

It's time for corporations to share the 'downturn' in the economy! The request for more money to insure Idaho's utility companies get high rates of return while most Idahoans continue to struggle is wrong and not justified! The "Fixed Cost Adjustment," which works to guarantee profits for utilities, is greed! If there are shortcomings, they should be shared and experienced by everyone: consumers AND utility companies!! I thought there was a surplus of water this year, so why the need to increase rates (Idaho Power and United Water) ??

Please describe your comment briefly:

Idaho's utility companies shouldn't get more money and high rates of return while most Idahoans continue to struggle b/c of a so-called "Fixed Cost Adjustment". Why should we automatically bear any shortcomings in energy sales, while always guaranteeing the utility company a profit? Plus why are only residential customers getting stuck with the tab, especially when the less electricity used will result in paing more? On top of that Idaho Power wants to hike the customer service charge by \$1! Enough already! We're all hurting financially and trying to do the right thing my conserving, and we won't be screwed by you.

Please describe your comment briefly:

We live on 5 acres and are totally reliant on electricity for all household and pasturage utilities, including our well. We cannot afford a power bill any higher than that under which we're currently straining. We are doing all we can to reduce our bill (decreased consumption of nearly 10% (achieved primarily through less A/C, despite 95+ temperatures) from August 2010 to August 2011; enrolled in 'cool credit') and urge the PUC in strongest possible terms to deny this Idaho Power rate increase request in its entirety.

Thanks for your consideration.

Please describe your comment briefly:

I am extremely concerned about Idaho Power's request for a rate hike and a major change in the way they gather their revenues. It appears it's on the backs of residential customers who right now are struggling. Also, I hope when these changes are considered, questions are asked about the salaries of Idaho Power's employees. If they get raises and increases while other groups are having their wages and salaries cut, this seems unfair. In a high water year the need for rate hikes is confusing. Please think of all of the users and their needs as you make your decision. Thank you

I recognise the need and right of a utility to make a fair profit. As a monopoly they are in a position to take advantage of their power to increase rates and take advantage of helpless consumers. Your job is to protect us. They should not be GUARANTEED profits. They need to earn their profits through effective policies and management. If they are guaranteed profit they WILL descend into sloppy practices. If you care to guarantee citizens an income.....

STOP THE POWER GRAB. These are economic hard times!

Utilities should not be allowed to raise the rates or pass on the shortages to the consumer. When is enough, enough? Many companies have had record years for income and yet they keep raising the rates while the typical family income goes down. In no way should the utilities be able to have a rate hike. Please look deep inside of yourselves and do the honest thing that is best for the people, not what is best for the rich. Thank you.

This is the wrong time for utility rate hikes. Idaho's utility companies shouldn't get more money and high rates of return while most Idahoans continue to struggle. 'NO WAY' to higher utility bills. As a struggling senior citizen on Social Security I have not seen a cost of living raise in three years and do not expect to see one any time soon because Congress says there is not one. With today's economy such as it is I am not singular in trying to make ends meet. Idahoans, seniors, families, simply cannot afford a utility increase at this time.

With Social Security saying there will be no increase for inflation this year and the Stocks loosing over 60% of the small investment fund we had. How is someone on a fixed income going to meet thier obligation to Idaho Power when it is a struggle for us to stay within our budget now?

With Idaho's unemployment rate so high, it is very difficult for seniors to find full or part time jobs to supplement thier Social Security income.

Please take these concerns into consideration in your decision.

Thank You

Gene and Nancy Plummer

I am a senior citizen on disability. I have a very hard time paying my bills. I don't qualify for food stamps and yet by the time I pay my mortgage, my utilities, my car, and my insurance I have no food or prescription money. My utilities always charges me a late fee to top it off. My check comes in the middle of the month after the due date. I can't afford any more bills. I don't understand why there is such a difference between utility companies in rates. City of Burley places less than Rupert and the Co-op pays less than both Cities. I have asked about that and was told to talk to the county commissioners. I feel that all utilities need to regulate a fair utility rate. Times are difficult and especially senior citizens need a better break than they are getting. I have no place to reduce my bills. Please don't raise to the point where I can't pay my mortgage or I will be on the street.

I am alarmed to hear that at a time of so many being unemployed, poor economy, the elderly seeing losses in their retirement plans, and rising food prices, that Idaho Power is requesting a rate increase. Not long ago they added \$3.83 to our bills for 'energy efficiency'. IP told me that this was to help people save money on their power bill. People already know that if you want a lower power bill use less power, but instead IP is charging us more for using less. Also, with the new 'smart' meters they are seeing a substantial savings on employees and gasoline used to read meters. This request by Idaho Power needs to be denied.

Please describe your comment briefly:

United Water wants a raise because customers use less water as we are ask to do by them It is not the time to raise rates on anyone during this time of financial difficulties that are center stage across America including Idaho Idaho's utility companies shouldn't get to bolster their bottom lines while many Idahoans are struggling to make ends meet. Idaho Powers measure called a "Fixed Cost Adjustment," which automatically shifts any shortcomings in energy sales the consumer is a terrible idea. Even if you made it go both ways. As in if they make more profit the cost to us goes down.

Just say no, that takes the oversight away from you for one thing.

Please describe your comment briefly:

These are tough times for everyone and this is not a good time for utility rate hikes. We did not receive any increase in cost of living for the past 2 years because the President deemed it so. Now we are asked to pay more for our power? Please consider the situation of people who are out of work and people struggling to make ends meet that are working. This has been a banner year for water, so there is no need for a rate increase. Idaho Power should not be guaranteed profit each year on the backs of their customers in the Treasure Valley.

Sincerely,
Elizabeth Blacker

If this concerns a Business, Business Name: none **Business Address:**
Business Phone: none
Name of Utility Company: none
Have you contacted the utility regarding your concern?: yes

Please describe your question or complaint briefly:

Idaho power is requesting a base rate increase to increase profits despite the state of the economy at this time. No way should this be allowed, Idaho power has plenty of excess supply that it sells to other companies at a HUGE profit. If this is allowed an investigation of collusion should be instigated .

Please describe your comment briefly:
How nice it would be if we common citizens could get permanent positive income adjustments, regardless of what is happening in the economy. Not only is this exceptionally bad timing for such a "Fixed Cost Adjustment," it is unrealistic for any business to expect guaranteed income, regardless of performance, market conditions, and innumerable other factors.

Just say 'NO!'

Please do not let them raise our utility bills higher than they already are. Most of us can't afford to pay them now with unemployment the way it is. They don't help out those who need it instead we are told to 'live within our means'. When you have very little 'means' to begin with how are we supposed to pay even higher rates? If they need more money make them take pay cuts like the rest of us. Thank you
