I would like you to know that I fully support the use and development of solar power in every way possible. This includes the co-use of solar and electric for any residence in the State, on a fair and equal basis of supply and demand and exchange rate for value. It is important for the utility company to be forward looking for the common good, not just for their own personal interests.

Thank you.

Please describe your comment briefly:

We want to have solar on our home soon. I believe it is the best interest of our country and state to encourage people to use solar and other renewable energy as much as possible. Making it easy, simple and financially rewarding for all of our citizens to help our country to create more renewable energy is necessary to encourage growth in this important area.
