A Comment from Michael Johnson follows:

Case Number: ipc-e-12-27
Name: Michael Johnson
Address: 5745 N. 10-Mile Rd.
City: Meridian
State: Idaho
Zip: 83646
Daytime Telephone: 208-344-2508
Contact E-Mail: mike@allowayelectric.com Name of Utility Company: Idaho Power
Acknowledge: acknowledge

Please describe your comment briefly:

I am an electrician by trade, we have assisted various customers over the years to build solar generation systems connected to net metered units. I think it would be patently unfair, given the encouragement they have received over the years from the federal government and others, to deny them reimbursement for energy they have generated through their own investment, time, and efforts.

The long term benefit of pushing such technologies is the relief that Idaho Power receives to their own infrastructure in terms of reduced loads and demand, and even though it creates a little bit of pain in the short term, I believe cogeneration technologies will eventually 'catch up' and provide meaningful benefit to the utility as well as the consumer.

Please describe your comment briefly:

I am a net metering customer and feel that the new rate proposal by Idaho Power puts an unfair burden on net metering customers. If this proposal would go into effect we would end up producing power for which Idaho Power would not reimburse us. The \$25 monthly fee would cancel out the benefit from producing our own electricity. That means that we end up paying Idaho Power to for the power that we produce! The proposal is unfair to net metering customers.
