Boise ID, 83704

Name of Utility Company: Idaho Power Co.
Acknowledge public record: True

Comment: OPPOSING IPC PROPOSAL TO THE NET METERING SERVICE CONTRACTS As a customer of Idaho Power, I am very concerned about the new IPC proposal to change the net metering service contracts. I have no ax to grind as I have no solar panels or windmills on my house but I know this new proposal will discourage people from investing in alternative energy for their homes, farms, businesses, etc. Decreasing our fossil fuel usage should be our number one priority.

Global warming is real, as we see the evidence every day in the news with ice caps melting, extreme weather patterns, sea levels rising and more. We have waited too long to take care of this problem of the earth's temperature rising at a faster rate than normal due to human activities. Let's not continue down this road any longer. Idaho Power's proposal is unconscionable and going in the wrong direction for sustaining a healthy inhabitable planet.
