Address: 13268 Dechambeau Way
Boise ID, 83714

Name of Utility Company: Idaho Power
Acknowledge public record: True

Comment: The current rate plan for net metering for alternative energy should remain in place. There should be no limit to the amount of alternative distributive power because in the age of climate change we need to diversify the power source from a variety of sources since no one source will be the silver bullet. Idaho Power shareholders and ratepayers would both benefit from a steady source of power and investment in the diversified portfolio.
