IDAHO PUBLIC  
UTILITIES COMMISSION

*IPC-E-13-16*

Dear ID P.U.C.,

I am a local business owner and voting citizen of Boise, Idaho. I am extremely concerned about the \$215 million business plan proposed by Idaho Power to upgrade the Jim Bridger Coal burning plant. This is an outdated utility that is threatening the health of our planet and a concern for public health, as well as a bad business plan.

I urge the P.U.C. to review all foreseeable pollution costs before approving this expenditure. I also urge the P.U.C. to become more forward thinking on energy sources that can be prolific and generative in our state.

Sincerely,

*Kyle Howell*  
*Healing Energies*

Comment: As 35 year Wood River Valley-Bellevue residents, we have been subjected to ongoing rate increases in our power service for reasons that have never been clearly demonstrated. We don't have air conditioning, yet we are subjected to so-called "summer premium rates". We are not Idaho Power Shareholders but it seems that we are being asked to line their pockets nevertheless. The burden for clean-up of Idaho Power Plants should not be placed upon customers while shareholders profit all the more!

Thank you,  
Mike and Amber Mattias  
Bellevue, Idaho

Comment: I do not want any funds to be allocated to upgrade existing Coal Plants that are not even in our state. It makes more financial and environmental sense to use 13 million dollars to invest in cleaner, more sustainable methods of harvesting energy (wind, solar).

Thank you for taking my opinion into consideration.
