Address: 1315 N. 14th
Boise ID, 83702

Name of Utility Company: Idaho Power
Acknowledge public record: True

Comment: Please deny Idaho Power's request to spend ratepayer dollars to upgrade coal plants. There are plenty of clean-energy renewable sources (such as solar and geothermal) that Idaho Power can spend these dollars on instead.

Name of Utility Company: Idaho Power
Acknowledge public record: False

Comment: Please deny Idaho Power's request to invest money in the coal-burning power plant in Wyoming. Instead, Idaho Power should be investing money in developing renewable sources of electricity such as solar and wind. Power companies in other states are doing this successfully and Idaho should follow suit.

Name of Utility Company: Idaho Power
Acknowledge public record: True

Comment: Do not to put Idaho Power ratepayers on the hook for Idaho Power's risky investments in aging coal plants. Idaho Public Utilities Commission (PUC) must not approve Idaho Power's current plan to charge ratepayers \$130 million to keep polluting coal plants in Wyoming clunking along for decades longer. The request for this ratepayer-funded expenditure is just the tip of the iceberg as the coal plants cost hundreds of millions of more dollars to keep in compliance with pending regulations. Idaho Power should be investing in Idaho's renewable energy future and energy efficiency. Instead the company is wasting money on old technology and protecting its stockholders - and seeking PUC assurance that it can pass these costs onto ratepayers.
